Professional Summary

Software Engineer with an MCA (2026) and hands-on experience building full-stack web applications, mobile apps, and AI-powered systems, currently interning at TAP Academy. Skilled in Python, Flask, React.js, Node.js, and MongoDB, with practical experience in REST APIs, cloud deployment (Vercel, Render, TiDB), and LLM-based applications using RAG. Strong foundation in Data Structures & Algorithms, OOP, and DBMS.

Technical Skills

Languages: Python, Java, JavaScript, Kotlin, Dart, SQL
Frontend & Mobile: React.js, HTML5, CSS3, Bootstrap, Android SDK, Flutter
Backend & Databases: Flask, FastAPI, Node.js, Express.js, REST APIs, SQLAlchemy, JWT Authentication, MySQL, TiDB, MongoDB, Firebase (Firestore, Realtime Database, Authentication)
AI / ML: Large Language Models (LLMs), Ollama, Retrieval-Augmented Generation (RAG), Vector Search, Embeddings, Prompt Engineering
Tools & Deployment: Git, GitHub, Linux, Vercel, Render, Agile/Scrum
Fundamentals: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Experience

Intern – TAP Academy Aug 2026 – Present
- Learning Python development while building hands-on projects in a structured internship program.
- Developing full-stack applications with a Python/Flask backend, relational databases, and REST APIs, and deploying them to live cloud environments.

Projects

KicksHub – Sneaker E-Commerce Platform | GitHub: github.com/adashish09/kickshub Sep 2026 – Oct 2026
Python, Flask, MySQL (TiDB), JWT Authentication, React.js | Live: kickshub-store
- Built and deployed a full-stack sneaker e-commerce platform with a Flask REST API and React storefront, hosted live on Vercel (frontend), Render (backend), and TiDB (database).
- Developed catalog search, filtering, and pagination, with JWT authentication, a database-backed cart, and transactional checkout.
- Built a role-based admin panel to manage products, categories, orders, and customers.

AI Resume Interviewer Platform | GitHub: github.com/adashish09/AI-Resume-Interviewer Apr 2026 – May 2026
React.js, Node.js, Express.js, Python, MongoDB, Ollama (Llama 3.1 8B), RAG
- Built an AI interview platform that parses resumes and generates role-specific questions using Llama 3.1 8B via Ollama, grounded by a RAG pipeline with embeddings and semantic search.
- Designed a 3-tier architecture (React, Node.js REST API, Python inference service) with streamed AI responses and adaptive follow-up questions.

NetSentinel – Network Intrusion Detection System | GitHub: github.com/adashish09/NetSentinel Jan 2026 – Mar 2026
Python, React.js, Linux, Packet Capture, Anomaly Detection
- Built a Linux-based system using Python packet capture to inspect live traffic and flag suspicious activity with threshold- and pattern-based rules.
- Developed a React.js dashboard for live traffic visualization, alert history, and threat monitoring.

FlipLearn – Cross-Platform Learning App Sep 2025 – Nov 2025
Flutter, Dart, Firebase Authentication, Cloud Firestore
- Built a cross-platform Flutter app with Firebase Authentication and Firestore, using local caching for offline-first sync.
- Designed a gamified quiz engine with dynamic content loading and per-user progress tracking.

Education

Master of Computer Applications (MCA) – Chandigarh University 2024 – 2026
CGPA: 8.24/10

Bachelor of Computer Applications (BCA) – IGNOU 2021 – 2024
Percentage: 70.11%

Certifications

AWS Academy Graduate – Generative AI Foundations
Prompt Engineering with GPT – Coursera
Front-End Apps with React – Coursera
ReactJS – Infosys SpringBoard
Android Mobile App Development – Coursera
